

Notice of Availability

Pursuant to the Council on Environmental Quality regulations that implement the National Environmental Policy Act, the U.S. Army Corps of Engineers, Albuquerque District, completed an Environmental Assessment (EA) for a proposal to reconstruct the water control structures that manage flows at two locations within the Acequia del Barranco in Rio Arriba County, New Mexico. The Acequia del Barranco is located approximately 5 miles downstream from Chama, New Mexico, along the Rio Chama. The Final EA and signed FONSI are available for public review online at <http://www.spa.usace.army.mil/FONSI/DEFAULT.htm>.
